Experience

Software Engineer Nov. 2025 – Present

Noon *Cairo, Egypt*

- Worked on Noon's chatting application to handle customer support issues.
- Worked on many agentic AI features, such as generating message recommendations and summarizing the chat.
- Built an agent to create tickets and auto-fill the fields with chat context for 70% of chat flows using LangGraph.
- Built a quality control platform to generate evaluations per chat with 90% accuracy using LangChain.
- Tools: Python, MySQL, LangGraph and GCP.

Google Summer of Code (GSoC) Contributor May 2025 – Aug. 2025

VideoLAN *Remote*

- Added an API to LibVLC for embedding video rendering in Wayland-based applications.
- Added support for window resizing and handled mouse events.
- Tested with 5 Wayland compositors and wrote a demo application with Qt.
- For more details, refer to the final report.
- Tools: C, C++, Wayland and Qt.

Education

Electronics and Communication Engineering Oct. 2020 – Jul. 2025

Faculty of Engineering, Sohag University *Sohag, Egypt*

- 87.63% (∼3.7/4.0 GPA), Excellent with honours degree.
- Ranked 1st among my colleagues in the ECE department.
- Topics: C/C++, OOP, Micro Processing, Computer Architecture, Embedded Systems, DSP, Information Theory.

Achievements

ICPC World Finalist 2025 – Honorable Mention, competed among the top 140 teams from around the world.

ACPC 2024 Silver Medalist – Ranked 6th among the top 150 teams in the Arab and African region.

ECPC 2024 Gold Medalist – Ranked 4th among 3000+ Egyptian teams.

Candidate Master on Codeforces – Rating 1907, solved 5000+ algorithmic problems.

Projects

Schooly (2025) (Graduation Project)

- Developed a full-stack school management system for online classes and smart attendance.
- Collaborated with front-end, mobile, and UI/UX teams to deliver a seamless experience for 50+ test users.
- Integrated the Agora SDK for video streaming capabilities and used Dlib for face recognition functionality.
- Managed deployment pipelines for both the back-end application and the AI model.
- Tools: C#, .NET Core, SQL Server, Python, AWS, GitHub Actions, and Agora SDK.

Smart Home (2023)

- Designed an embedded system for home automation with fire safety features.
- Integrated peripherals: Keypad, LCD, sensors via SPI/ADC protocols, and Interrupts.
- Tools: Embedded C, Proteus, and AVR Atmega32.

Volunteering

Judging & Problem Setting Jul. 2023 – Present

- Participated as a judge in ACPC 2025 and authored 2 problems.
- Judged Day 6 of the ECPC 2025 qualifications and authored problems for other qualifications.
- Tested 3 Codeforces rounds and many national contests, such as Syria and Tunisia.

Skills

Languages: C, C++, Python, C#, and SQL
Concepts: OOP, Data Structures, Algorithms, Databases, Problem Solving, and Agile Methodology
Frameworks: FastAPI, LangGraph, ASP.NET Core, and Google Cloud Platform
